

EDS Consultancy Limited (EDS) is a specialist civil and structural engineering company. The services we offer include analysis, design and fabrication through to supply and installation. EDS specialises in the installation and project management of self-supporting towers, guyed masts, monopole structures and their relevant reinforce concrete foundations.

Clients benefit from the experience of our qualified engineers and professional technicians as well as our comprehensive range of analysis and detailing tools. Our state of the art software and years of experience enable us to cater for clients with a wide variety of complex or simple structures. EDS provides clients with structural engineering and steelworks fabrications that meet British, European and Internationally recognised Standards.

The following is indicative, but not exhaustive of services available:

- Feasibility and Initial Schematic design
- Detailed design and Appraisal
- Static, Dynamic and Finite Element Analysis
- Design, Inspection and Structural Reports for Building Projects
- Project Management
- Tower Asset Management
- Site Survey, Inspection and Antenna Audit
- Custom Design and Compliance Certification
- Planning and Fabrication Drawings
- Material Procurement and Fabrication
- Tower Installation and Foundation Construction

We understand our clients' need for projects to be delivered on time and within budget. Whether we are providing an outline design as a first step to getting planning permission, or taking on the full management of your project, our principal objective is to provide a professional and quality service at a competitive price.
